**Hesse Lignal**
inspiring you

Environmentally aware and sustainable. Simply cool.

Use the COOL family to meet all your requirements in terms of interior fittings.

- 1C HYDRO lacquer system with good chemical and mechanical resistance
- Suitable for sustainable construction projects
- No unpleasant odours
- High sustainability factor due to low VOC content

Your COOL family quartet

The COOL family comprises a one component water-based lacquer system. It includes our COOL-FILL Filler, COOL-COLOR Colour lacquer, COOL-TOP Clear basecoat and top coat, and our COOL-NATURA Natural wood effect.

The COOL family enables you to master the majority of surface requirements on high quality interior fittings. And all of the above in a low-emission, low-flammable and sustainable manner. Because they meet the requirements of both the German "Blue Angel" eco-label and the DGNB quality level 4 criteria. So nothing stands in the way of their use in sustainable building projects (including LEED, DGNB, BNB, etc.).

Your unbeatable COOL family!

COOL-FILL

Our COOL-FILL is an ideal choice of filler on the widest variety of woods, priming foils and MDF, even on MDF edges.

- **Fast-drying**
- **Quick and very good sanding properties**
- **Can be recoated using all conventional lacquer systems**

COOL-FILL
